I'd like to build the agenda view of my org-mode file to show different columns depending on who/what is going on. In this screencast I have a "Team Leads" and "Project Managers" column of course, but I'd like to have one or two other columns, such as "Lead Developer" or "Engineer" as columns. Note: I'm aware that I could add a formula to achieve what I'm after but I'm very much opposed to having to create and maintain my own db/datastore because of the complex nature of the columns. I'd like to know what's the best way to do this kind of thing. So far I'm thinking of the same thing as with the'specific voice' thing: create different agenda items with the voice tag on each org-agenda and then use 'org-agenda-view-all-agenda-entries' and 'org-agenda-view-all-headlines' to change the 09e8f5149f

This paper reviews the literature examining the risks associated with maternal alcohol use during pregnancy. The evidence is reviewed from two perspectives: studies of consequences of maternal drinking during pregnancy are identified and synthesized, and a range of studies are highlighted that document the dangers of prenatal depression. A broad definition of the terms maternal drinking and prenatal depression is adopted to maximize the reach of these conclusions. It is concluded that maternal drinking during pregnancy is associated with a number of adverse health effects for the mother and the child. Prenatal depression is also a health problem that requires further research.Cheaper than those yellow bumpers used in family sedans, these are perfect for the money-conscious.
