Use the scan button to see all your connections and see the settings of. Use the map to view where your devices and adapters are connected and.A polymorphism in the c-fos gene and its association with platelet TxA2 formation in platelet storage media. Platelet-derived growth factor (PDGF) stimulates the production of thromboxane A2 (TxA2) by interacting with specific receptors on the platelet membrane. The c-fos gene was studied to see if it was involved in the regulation of TxA2 production. The c-fos gene polymorphism at base pair position +936 was determined by a polymerase chain reaction-restriction fragment length polymorphism method, and TxA2 formation was analyzed by gas chromatography. The +936 A/G polymorphism showed no significant effect on basal TxA2 formation in platelet storage media. PDGF stimulation also had no effect. There was no evidence of an interaction between the c-fos gene and PDGF in the regulation of TxA2 production.Antigen-specific Th2 cells in asthma: the importance of interleukin-4 and its receptor. To investigate edd6d56e20
